EnRizhe™

Mycorrhizal Biofertilizer

Kriya™

Product Type : **Mycorrhizal Biofertilizer**
Propagule Count: : **> 1500 propagules per gram**
Mode of Use : **Soil application for root colonization and nutrient uptake enhancement.**

PRODUCT DESCRIPTION

EnRhize™ is a mycorrhizal bioferttilizer containing vesicular arbuscular mycorrhizae (VAM), beneficial symbiotic fungi that colonize plant roots and form an extensive hyphal network in the soil. Once established in the root system, the mycorrhizal fungi enhance nutrient and water absorption, particularly phosphorous and micronutrients, improving plant growth under diverse soil conditions.

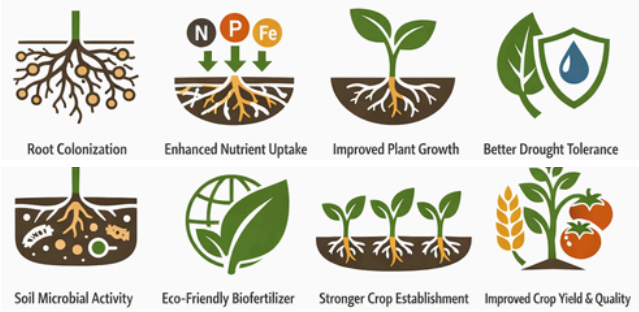
MECHANISM OF ACTION

APPLICATION & DOSAGE

Soil Application	2 - 4 kg per acre
Planting Application	5 - 10 g / plant for transplanting
Seed Treatment	10 g per kg of seeds

TARGET CROPS: Rice, maize, wheat, millets, pulses, groundnut, soybean, cotton, sugarcane, vegetables, fruits, spices, plantation crops including banana, coconut, coffee, tea, grapes, citrus, mango, and other horticultural crops.

KEY BENEFITS



TECHNICAL SPECIFICATIONS

Parameter	Specification
Active Microorganism	Vesicular Arbuscular Mycorhizae (VAM)
Formulation Type	Granular / Carrier Based
Spore Count	> 500 spores per gram
Solubility	Dispersible in water
Moisture Content	≤ 10%
Shelf Life	24 months under recommended storage

STORAGE & HANDLING

- Store in a cool, dry place
- Keep container sealed after use
- Protect from direct Sunlight and Moisture
- Avoid contact with Chemicals

SAFETY INFORMATION

- Wear gloves and mask during application
- Wash hands after use
- Avoid inhaling dust during handling
- Keep out of reach of children
