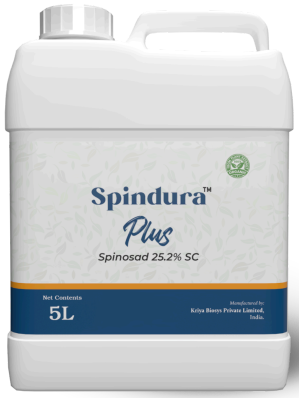
Spindura™ Plus

Kriya™

Biological Insecticide



PRODUCT DESCRIPTION

Spindura™ Plus is a biologically derived insecticide formulated with Spinosad, a fermentation metabolite produced by the soil actinomytete Saccharpolyspora spinosa. The suspension concentrate formulation ensures stable dispersion and efective delivery of the active ingredient on crop foliage. Spinosad acts through both ingestion and contact activity, disrupting the insect nervous system and causing rapid feeding cessation followed by paralysis and mortality.

MECHANISM OF ACTION

APPLICATION & DOSAGE

Foliar Spray	0.25 - 0.35 mL per litre of water 60 - 90 mL per acre
First Application	At early pest infestation
Repeat Spray	Begin monitoring crop regularly
Best Time	Depending on pest pressure

TARGET CROPS: Cotton, rice, maize, pulses, oilseeds, vegetables including tomato, chilli, cabbage, cauliflower, brinjal; fruits like grapes, citrus, pomegranate; and other horticultural and plantation crops.

KEY BENEFITS

TECHNICAL SPECIFICATIONS

Parameter	Specification
Active Ingredients	Spinosad
Concentration	25.2% SC
Botanical Source	*Saccharopolyspp spinosa*
Formulation Type	Suspension Concentrate
Appearance	Light brown to amber liquid
Shelf Life	24 months
Solubility	Completely soluble in water

STORAGE & HANDLING

- Store in a cool, dry place
- Keep container sealed after use
- Protect from direct Sunlight and Moisture
- Avoid contact with Chemicals

SAFETY INFORMATION

- Wear gloves and mask during application
- Wash hands after use
- Avoid inhaling dust during handling
- Keep out of reach of children
