

# Admira<sup>TM</sup> A dove

Clove Oil Formulation

Adove is a natural biocontrol agent formulated with 2% clove oil as the active ingredient, rich in the bioactive compound eugenol. Known for its broad-spectrum antimicrobial, antifungal, and insecticidal properties, A dove effectively suppresses a wide range of agricultural pests and pathogens. The emulsifiable concentrate formulation ensures excellent dispersibility, stable emulsification in water, and uniform spray coverage for enhanced bioactivity.

## Product Overview

### Active Ingredients

Clove Oil Formulation

### Formulation Type

Water-Soluble Powder (WSP)  
/ Emulsifier Concentration (EC)

## Application Guidelines

Dosage (per acre)	Dilution
500 - 750 ml	5 - 7 ml/L
400 - 600 g	4 - 6 g/L

## Pests Controlled

Soft-bodied insects (aphids, thrips, whiteflies, mites, mealybugs, soft scales) and foliar fungal pathogens (Botrytis, powdery mildews – suppression only).

## Key Benefits

- Natural alternative to synthetic fungicides and insecticides
- Broad-spectrum antimicrobial and insecticidal activity
- Enhances plant health by reducing disease and pest pressure
- Safe for beneficial insects and non-target organisms when used as directed
- Compatible with most agrochemicals and fertilizers

## Use Sites

Nurseries

Gardening

Greenhouse

Turf

Agriculture

Horticulture

Forestry

Hydroponics

Chemigation

Soil Drench

## Shelf Life & Storage

24 months from manufacturing date. Store in a cool, dry, well-ventilated.

## Ideal Spray Interval

7 to 10 Days depending on the pest incidence.

## Re-Entry & Pre-Harvest Intervals

REI: 4 Hours | PHI: 0 days (Harvest can be carried out immediately after application).

## Safety & Handling

Safe for humans, & beneficial organisms.

Wear protective gloves & mask.

Avoid contact with eyes & skin.

Wash equipment & hands after use.
