

# Spindura<sup>TM</sup> *Plus* Spinosad 25.2% SC

Spindura Plus is a powerful broad-spectrum, eco-friendly biological insecticide produced by fermentation of the bacterium *Saccharopolyspora spinosa*. It is favored for its effectiveness on resistant and hard-to-control pests and its minimal impact on beneficial insects.

## Product Overview

### Active Ingredients

Spinosad 25.2% SC

### Formulation Type

Suspension Concentrate (SC)

## Application Guidelines

### Dosage (per acre)

150 - 300 ml

### Dilution

0.5 - 1 ml/L

## Pests Controlled

Caterpillars, Thrips, Leaf miners, Fruit borers, Pod borer, Diamondback moth, Dipteran larvae, Colorado potato beetles, Lepidopterous larvae (worms & caterpillars), army worms, spotted wing drosophila, flea beetles.

## Key Benefits

- Rapid knockdown and extended residual effect.
- Novel mode of action targets nervous system, often effective where resistance to other insecticides has developed.
- Safe for beneficial insects when used as directed, making it compatible with integrated pest management (IPM) strategies.
- Minimal residue, safe for use close to harvest.

## Use Sites

Nurseries

Gardening

Greenhouse

Turf

Agriculture

Horticulture

Forestry

Hydroponics

Chemigation

Soil Drench

## Shelf Life & Storage

24 months from manufacturing date. Store in a cool, dry, well-ventilated.

## Ideal Spray Interval

4 to 7 Days depending on the pest incidence.

## Re-Entry & Pre-Harvest Intervals

REI: 4 Hours | PHI: 1 day.

## Safety & Handling

Safe for humans, & beneficial organisms.

Wear protective gloves & mask.

Avoid contact with eyes & skin.

Wash equipment & hands after use.
