

# Biota-H

*Trichoderma harzianum*

Biota-H is a biological fungicide based on *Trichoderma harzianum*, a beneficial soil fungus known for its powerful antifungal and plant-growth-promoting activity. It colonizes the rhizosphere and root surface, creating a natural protective barrier against soil-borne and seed-borne fungal pathogens. Through mechanisms like competition, antibiosis, mycoparasitism, and induced systemic resistance, Biota-H suppresses harmful fungi while stimulating robust root growth, nutrient uptake, and overall plant resilience.

## Product Overview

### Active Ingredients

*Trichoderma harzianum*

### Formulation Type

Water Soluble Powder (WSP)  
/ Suspension Liquid (SL)

## Application Guidelines

Dosage (per acre)	Potency
1 - 2.5 Litres	$1 \times 10^8$ CFU/mL
1.0 - 2.5 kg	$1 \times 10^8$ CFU/g

## Target Pathogens

Trichoderma harzianum is effective against a wide range of soil-borne and seed-borne fungal pathogens, including: Fusarium spp, Rhizoctonia , Sclerotium rolfsii , Pythium spp. (causes seedling blight and damping-off) Phytophthora spp, Botrytis spp, Colletotrichum spp, Alternaria spp.

## Key Benefits

- Broad-spectrum suppression of major soil & seed-borne fungi
- Rapid rhizosphere colonization & root protection
- Enhances root growth & nutrient uptake
- Promotes healthier plants & higher yield potential
- Reduces dependency on chemical fungicides
- Safe, residue-free, and sustainable

## Use Sites

Nurseries

Gardening

Greenhouse

Turf

Agriculture

Horticulture

Forestry

Hydroponics

Chemigation

Soil Drench

## Shelf Life & Storage

24 months from manufacturing date. Store in a cool, dry, well-ventilated.

## Ideal Spray Interval

7 to 10 Days depending on the pest incidence.

## Re-Entry & Pre-Harvest Intervals

REI: 4 Hours | PHI: 0 days (Harvest can be carried out immediately after application).

## Safety & Handling

Safe for humans, & beneficial organisms.

Wear protective gloves & mask.

Avoid contact with eyes & skin.

Wash equipment & hands after use.
